

**Anel
Kabysheva**
Data Analyst

Courses

Data Analytics

Academica | 5-month online course | Completion: Jan, 2025

Data Analysis:

- Data cleaning, processing, and analysis using **Python (Pandas, NumPy)**.
- Writing **SQL** queries, including data joins (**JOINS**), window functions, and aggregate calculations.
- Working with **Excel**: pivot tables, formulas, and automation of routine tasks.

Machine Learning and Statistical Analysis:

- Basics of machine learning with **Scikit-learn**: regression, classification, clustering.
- Application of mathematical statistics: correlation analysis, hypothesis testing.
- Conducting **A/B** testing and analyzing experiment results.

Data Visualization and BI:

- Creating interactive dashboards in **Power BI** and **Tableau**.
- Developing **DAX** formulas and integrating with multiple data sources.
- Data visualization in **Python** using **Matplotlib** and **Seaborn**.

Work Experience

15+ years in Contracts and Cost Control Management

2009 - 2024

Key Functions:

- **Full-cycle contract management**: From drafting and negotiating contract terms to overseeing execution and closure.
- **Cost control and budgeting**: Planning, analyzing, and optimizing expenses across projects of various scales while ensuring compliance with budget constraints.
- **Risk management**: Developing and implementing strategies to identify, assess, and mitigate financial, legal, and operational risks.

Key Achievements:

Cost Optimization & Resource Management:

- Reduced project expenses by 10% through contract optimization and efficient resource management.
- Prevented 15% budget overruns on large-scale projects, including the NWTF project at the Bolashak plant (\$135M).

Risk Management:

- Implemented risk management systems, reducing the number of contract disputes by 15%.

Analytics & Reporting Automation:

- Developed and configured interactive Power BI reports to analyze cost trends and project status.

Education

Atyrau State University named after Kh. Dosmukhamedov
Jurisprudence

2021 - 2023

Atyrau Oil & Gas University named after S.Utebayev
Chemical Technology Engineering

2009 - 2012
